

Cutting Template to Get Five Card Layer Panels from One Sheet of Cardstock

Start by placing your cardstock short side against the top (cutting on the long side) and cut at 3 $\frac{5}{8}$ ".

Take the narrower strip and place the long side against the top (cutting on the short side) and cut at 4 $\frac{7}{8}$ " twice. You will have one small strip to add to your scraps.

Take the wider strip and place the long side against the top (cutting on the short side) and cut at 3 $\frac{5}{8}$ " twice.

You now have five equal sized panels!
